Wind Flower - The Flower Expert - Flowers Encyclopedia Wind Flower Wood Anemone/Wind Flower Anemone nemorosa A wild flower, commonly known as the wood anemone, smellfox, or crowfoot, is a species of the genus *Anemone*. The flower has no honey and little scent, and apparently relies little on the visits of insects for the fertilization of its one-celled seed-vessels, which are in form like those of the butter-cup, arranged in a mass in the centre of the many stamens, and are termed achenes. Windflower | LoveToKnow Windflowers grow underground from tubers or rhizomes to form small colonies. Depending on the variety, the flower stalks grow from six inches tall to nearly six feet. Flower color varies widely, but the blossoms are generally two to three inches in diameter with thin, delicate petals. Deer Resistant - Grecian Windflowers Fanciful, daisyshaped flowers up to 2" across bloom before many crocus and continue their delightful colour show for weeks. This coordinated mix features blue, white, pink and charming bicolours above a backdrop of lovely, fernlike foliage.

How to Grow Windflowers | Home Guides | SF Gate Windflowers (*Anemone blanda*) provide dense clumps of attractive foliage and spring-blooming purple flowers. Although perennial, windflowers may only grow as annuals in wet, rainy areas or those with mild winters.
